

## 1. Description

### 1.1. Project

|                 |                            |
|-----------------|----------------------------|
| Project Name    | HFT-Core-Module_TrueSTUDIO |
| Board Name      | HFT-Core-Module_TrueSTUDIO |
| Generated with: | STM32CubeMX 4.26.1         |
| Date            | 08/26/2018                 |

### 1.2. MCU

|                |                |
|----------------|----------------|
| MCU Series     | STM32L4        |
| MCU Line       | STM32L4x6      |
| MCU name       | STM32L496ZGTxP |
| MCU Package    | LQFP144        |
| MCU Pin number | 144            |

## 2. Pinout Configuration

### 3. Pins Configuration

| Pin Number<br>LQFP144 | Pin Name<br>(function after<br>reset) | Pin Type | Alternate<br>Function(s) | Label               |
|-----------------------|---------------------------------------|----------|--------------------------|---------------------|
| 1                     | PE2 *                                 | I/O      | GPIO_Input               |                     |
| 2                     | PE3                                   | I/O      | SAI1_SD_B                | I2S_SD_OUT          |
| 3                     | PE4 *                                 | I/O      | GPIO_Input               |                     |
| 4                     | PE5 *                                 | I/O      | GPIO_Input               |                     |
| 6                     | VBAT                                  | Power    |                          |                     |
| 7                     | PC13                                  | I/O      | SYS_WKUP2                | MCU_WAKEUP          |
| 8                     | PC14-OSC32_IN (PC14)                  | I/O      | RCC_OSC32_IN             | MCU_OSC32_IN        |
| 9                     | PC15-OSC32_OUT (PC15)                 | I/O      | RCC_OSC32_OUT            | MCU_OSC32_OUT       |
| 10                    | PF0                                   | I/O      | I2C2_SDA                 | MCU_I2C2_SDA        |
| 11                    | PF1                                   | I/O      | I2C2_SCL                 | MCU_I2C2_SCL        |
| 12                    | PF2 *                                 | I/O      | GPIO_Input               |                     |
| 13                    | PF3                                   | I/O      | ADC3_IN6                 | ADC3_IN6_20MHZ_PULL |
| 16                    | VSS                                   | Power    |                          |                     |
| 17                    | VDD                                   | Power    |                          |                     |
| 18                    | PF6                                   | I/O      | TIM5_CH1                 | MCU_TIMCAP_N        |
| 19                    | PF7                                   | I/O      | TIM5_CH2                 | MCU_TIMCAP_W        |
| 20                    | PF8                                   | I/O      | TIM5_CH3                 | MCU_TIMCAP_S        |
| 21                    | PF9                                   | I/O      | TIM5_CH4                 | MCU_VSOL_TIMCAP     |

\* The pin is affected with an I/O function

## 4. Clock Tree Configuration

## 5. IPs and Middleware Configuration

### 5.1. ADC1

**IN8: IN8 Single-ended**

**mode: Temperature Sensor Channel**

**mode: Vbat Channel**

**mode: Vrefint Channel**

#### 5.1.1. Parameter Settings:

##### ADCs\_Common\_Settings:

Mode Independent mode

##### ADC\_Settings:

Clock Prescaler Asynchronous clock mode divided by 1

Resolution ADC 12-bit resolution

Data Alignment Right alignment

Scan Conversion Mode Disabled

Continuous Conversion Mode Disabled

Discontinuous Conversion Mode Disabled

DMA Continuous Requests Disabled

End Of Conversion Selection End of single conversion

Overrun behaviour Overrun data preserved

Low Power Auto Wait Disabled

##### ADC\_Regular\_ConversionMode:

Enable Regular Conversions Enable

Enable Regular Oversampling Disable

Number Of Conversion 1

External Trigger Conversion Source Regular Conversion launched by software

External Trigger Conversion Edge None

Rank 1

Channel

##### Channel Temperature Sensor \*

Sampling Time 2.5 Cycles

Offset Number No offset

##### ADC\_Injected\_ConversionMode:

Enable Injected Conversions Disable

##### Analog Watchdog 1:

Enable Analog WatchDog1 Mode false

##### Analog Watchdog 2:

Enable Analog WatchDog2 Mode false

##### Analog Watchdog 3:

Enable Analog WatchDog3 Mode false

## 5.2. ADC3

### IN6: IN6 Single-ended

|------------------------------|-------|
| Enable Analog WatchDog2 Mode | false |
|------------------------------|-------|

##### Analog Watchdog 3:

|                              |       |
|------------------------------|-------|
| Enable Analog WatchDog3 Mode | false |
|------------------------------|-------|

## 5.3. CRC

**mode: Activated**

### 5.3.1. Parameter Settings:

#### Basic Parameters:

|                          |        |
|--------------------------|--------|
| Default Polynomial State | Enable |
| Default Init Value State | Enable |

#### Advanced Parameters:

|                            |         |
|----------------------------|---------|
| Input Data Inversion Mode  | None    |
| Output Data Inversion Mode | Disable |
| Input Data Format          | Bytes   |

## 5.4. DFSDM1

**mode: Parallel input**

**mode: Parallel input**

### 5.4.1. Filter 0:

#### regular channel selection:

|                                     |                    |
|-------------------------------------|--------------------|
| regular channel selection           | <b>Channel 0 *</b> |
| Continuous Mode                     | Continuous Mode    |
| Trigger to start regular conversion | Software trigger   |
| Fast Mode                           | Disable            |
| Dma Mode                            | Disable            |

#### injected channel selection:

|                              |         |
|------------------------------|---------|
| Channel0 as injected channel | Disable |
| Channel1 as injected channel | Disable |
| Channel2 as injected channel | Disable |
| Channel3 as injected channel | Disable |
| Channel4 as injected channel | Disable |
| Channel5 as injected channel | Disable |
| Channel6 as injected channel | Disable |
| Channel7 as injected channel | Disable |

#### Filter parameters:

|            |                      |
|------------|----------------------|
| Sinc Order | FastSinc filter type |
| Fosr       | 1                    |
| Iosr       | 1                    |

#### 5.4.5. Channel 0:

##### Channel 0 Parallel input selection:

Multiplexer\_Internal\_CH0 Data are taken from internal register

##### Channel 0 parameters:

Data Packing Standard data packing mode  
Right Bit Shift **0x00 \***

#### 5.4.6. Channel 1:

##### Channel 1 Parallel input selection:

Multiplexer\_Internal\_CH1 Data are taken from internal register

##### Channel 1 parameters:

Data Packing Standard data packing mode  
Right Bit Shift **0x00 \***

### 5.5. DMA2D

mode: Activated

#### 5.5.1. Parameter Settings:

##### Basic Parameters:

Transfer Mode Memory to Memory  
Color Mode ARGB8888  
Output Offset 0

##### Foreground layer Configuration:

DMA2D Input Color Mode ARGB8888  
DMA2D ALPHA MODE No modification of the alpha channel value  
Input Alpha 0  
Input Offset 0

|                         |                            |
|-------------------------|----------------------------|
| DMA2D ALPHA Inversion   | Regular Alpha              |
| DMA2D Red and Blue swap | Regular mode (RGB or ARGB) |

## 5.6. I2C1

### I2C: I2C

#### 5.6.1. Parameter Settings:

##### Timing configuration:

|                               |                     |
|-------------------------------|---------------------|
| I2C Speed Mode                | <b>Fast Mode *</b>  |
| I2C Speed Frequency (KHz)     | 400                 |
| Rise Time (ns)                | 0                   |
| Fall Time (ns)                | 0                   |
| Coefficient of Digital Filter | 0                   |
| Analog Filter                 | Enabled             |
| Timing                        | <b>0x0010061A *</b> |

##### Slave Features:

|                                  |          |
|----------------------------------|----------|
| Clock No Stretch Mode            | Disabled |
| General Call Address Detection   | Disabled |
| Primary Address Length selection | 7-bit    |
| Dual Address Acknowledged        | Disabled |
| Primary slave address            | 0        |

## 5.7. I2C2

### I2C: I2C

#### 5.7.1. Parameter Settings:

##### Timing configuration:

|                               |                     |
|-------------------------------|---------------------|
| I2C Speed Mode                | <b>Fast Mode *</b>  |
| I2C Speed Frequency (KHz)     | 400                 |
| Rise Time (ns)                | 0                   |
| Fall Time (ns)                | 0                   |
| Coefficient of Digital Filter | 0                   |
| Analog Filter                 | Enabled             |
| Timing                        | <b>0x0010061A *</b> |

##### Slave Features:

|                                |          |
|--------------------------------|----------|
| Clock No Stretch Mode          | Disabled |
| General Call Address Detection | Disabled |

|                                  |          |
|----------------------------------|----------|
| Primary Address Length selection | 7-bit    |
| Dual Address Acknowledged        | Disabled |
| Primary slave address            | 0        |

## 5.8. I2C3

### I2C: I2C

#### 5.8.1. Parameter Settings:

##### Timing configuration:

|                               |                     |
|-------------------------------|---------------------|
| I2C Speed Mode                | <b>Fast Mode *</b>  |
| I2C Speed Frequency (KHz)     | 400                 |
| Rise Time (ns)                | 0                   |
| Fall Time (ns)                | 0                   |
| Coefficient of Digital Filter | 0                   |
| Analog Filter                 | Enabled             |
| Timing                        | <b>0x0010061A *</b> |

##### Slave Features:

|                                  |          |
|----------------------------------|----------|
| Clock No Stretch Mode            | Disabled |
| General Call Address Detection   | Disabled |
| Primary Address Length selection | 7-bit    |
| Dual Address Acknowledged        | Disabled |
| Primary slave address            | 0        |

## 5.9. I2C4

### I2C: I2C

#### 5.9.1. Parameter Settings:

##### Timing configuration:

|                               |                     |
|-------------------------------|---------------------|
| I2C Speed Mode                | <b>Fast Mode *</b>  |
| I2C Speed Frequency (KHz)     | 400                 |
| Rise Time (ns)                | 0                   |
| Fall Time (ns)                | 0                   |
| Coefficient of Digital Filter | 0                   |
| Analog Filter                 | Enabled             |
| Timing                        | <b>0x0010061A *</b> |

##### Slave Features:

|                       |          |
|-----------------------|----------|
| Clock No Stretch Mode | Disabled |
|-----------------------|----------|

|                                  |          |
|----------------------------------|----------|
| General Call Address Detection   | Disabled |
| Primary Address Length selection | 7-bit    |
| Dual Address Acknowledged        | Disabled |
| Primary slave address            | 0        |

## 5.10. RCC

**High Speed Clock (HSE): BYPASS Clock Source**

**Low Speed Clock (LSE) : Crystal/Ceramic Resonator**

**mode: Master Clock Output**

**CRS SYNC: CRS SYNC Source USB**

### 5.10.1. Parameter Settings:

#### System Parameters:

|                   |                    |
|-------------------|--------------------|
| VDD voltage (V)   | 3.3                |
| Instruction Cache | Enabled            |
| Prefetch Buffer   | <b>Enabled *</b>   |
| Data Cache        | Enabled            |
| Flash Latency(WS) | 0 WS (1 CPU cycle) |

#### RCC Parameters:

|                                |                                     |
|--------------------------------|-------------------------------------|
| HSI Calibration Value          | 64                                  |
| MSI Calibration Value          | 0                                   |
| MSI Auto Calibration           | Disabled                            |
| HSE Startup Timeout Value (ms) | 100                                 |
| LSE Startup Timeout Value (ms) | 5000                                |
| LSE Drive Capability           | LSE oscillator low drive capability |

#### Power Parameters:

|                               |                                 |
|-------------------------------|---------------------------------|
| Power Regulator Voltage Scale | Power Regulator Voltage Scale 1 |
|-------------------------------|---------------------------------|

#### CRS Parameters:

|                               |                       |
|-------------------------------|-----------------------|
| CRS Synchro Divider           | 1                     |
| CRS Synchro Polarity          | Active on rising edge |
| CRS Synchro Reload Value Type | Automatic             |
| CRS Synchro frequency (Hz)    | 1000                  |
| Error limit Value             | 34                    |
| HSI48 Calibration Value       | 32                    |

## 5.11. RNG

**mode: Activated**

## **5.12. RTC**

**mode: Activate Clock Source**

**mode: Activate Calendar**

**Alarm A: Internal Alarm A**

**Alarm B: Internal Alarm B**

**WakeUp: Internal WakeUp**

### **5.12.1. Parameter Settings:**

#### **General:**

|                               |               |
|-------------------------------|---------------|
| Hour Format                   | Hourformat 24 |
| Asynchronous Predivider value | 127           |
| Synchronous Predivider value  | 255           |

#### **Calendar Time:**

|  |                             |
|--|-----------------------------|
| Data Format                                | <b>Binary data format *</b> |
| Hours                                      | 0                           |
| Minutes                                    | 0                           |
| Seconds                                    | 0                           |
| Day Light Saving: value of hour adjustment | Daylightsaving None         |
| Store Operation                            | Storeoperation Reset        |

#### **Calendar Date:**

|          |             |
|----------|-------------|
| Week Day | Monday      |
| Month    | January     |
| Date     | 1           |
| Year     | <b>18 *</b> |

#### **Alarm A:**

|                          |                                 |
|--------------------------|---------------------------------|
| Hours                    | 0                               |
| Minutes                  | 0                               |
| Seconds                  | 0                               |
| Sub Seconds              | 0                               |
| Alarm Mask Date Week day | <b>Enable *</b>                 |
| Alarm Mask Hours         | <b>Enable *</b>                 |
| Alarm Mask Minutes       | <b>Enable *</b>                 |
| Alarm Mask Seconds       | <b>Enable *</b>                 |
| Alarm Sub Second Mask    | All Alarm SS fields are masked. |
| Alarm Date Week Day Sel  | Date                            |

| Wake Up Counter          | 0                               |

### 5.13. SAI1

**Mode: Master with Master Clock Out**

**mode: I2S/PCM Protocol**

#### 5.13.1. Parameter Settings:

##### SAI B:

###### Basic Parameters

|                         |                    |
|-------------------------|--------------------|
| Audio Mode              | Master Transmit    |
| Output Mode             | Stereo             |
| Companding Mode         | No companding mode |
| SAI SD Line Output Mode | Driven             |

###### Protocol Parameters

|                                    |              |
|------------------------------------|--------------|
| Protocol                           | I2S Standard |
| Data Size                          | 16 Bits      |
| Number of Slots (only Even Values) | 2            |

###### Clock Parameters

|                        |         |
|------------------------|---------|
| Master Clock Divider   | Enabled |
| Audio Frequency        | 192 KHz |
| Real Audio Frequency   | 0       |
| Error between Selected | 0       |

###### Advanced Parameters

|                          |          |
|--------------------------|----------|
| Fifo Threshold           | Empty    |
| Output Drive             | Disabled |
| Synchronization External | Disabled |

## 5.14. SAI2

**Mode: Asynchronous Slave**

**mode: I2S/PCM Protocol**

### 5.14.1. Parameter Settings:

#### SAI A:

##### Basic Parameters

|                         |                    |
|-------------------------|--------------------|
| Audio Mode              | Slave Receive      |
| Output Mode             | Stereo             |
| Companding Mode         | No companding mode |
| SAI SD Line Output Mode | Driven             |

##### Protocol Parameters

|                                    |              |
|------------------------------------|--------------|
| Protocol                           | I2S Standard |
| Data Size                          | 16 Bits      |
| Number of Slots (only Even Values) | 2            |

##### Clock Parameters

##### Advanced Parameters

|                          |          |
|--------------------------|----------|
| Fifo Threshold           | Empty    |
| Output Drive             | Disabled |
| Synchronization External | Disabled |

## 5.15. SPI1

**Mode: Full-Duplex Master**

### 5.15.1. Parameter Settings:

#### Basic Parameters:

|              |                 |
|--------------|-----------------|
| Frame Format | Motorola        |
| Data Size    | <b>8 Bits *</b> |
| First Bit    | MSB First       |

#### Clock Parameters:

|                           |                      |
|---------------------------|----------------------|
| Prescaler (for Baud Rate) | <b>4 *</b>           |
| Baud Rate                 | <b>4.0 MBits/s *</b> |
| Clock Polarity (CPOL)     | Low                  |
| Clock Phase (CPHA)        | 1 Edge               |

#### Advanced Parameters:

|                 |          |
|-----------------|----------|
| CRC Calculation | Disabled |
|-----------------|----------|

|                 |          |
|-----------------|----------|
| NSSP Mode       | Enabled  |
| NSS Signal Type | Software |

## 5.16. SPI3

**Mode: Full-Duplex Master**

### 5.16.1. Parameter Settings:

#### Basic Parameters:

|              |                 |
|--------------|-----------------|
| Frame Format | Motorola        |
| Data Size    | <b>8 Bits *</b> |
| First Bit    | MSB First       |

#### Clock Parameters:

|                           |                      |
|---------------------------|----------------------|
| Prescaler (for Baud Rate) | <b>4 *</b>           |
| Baud Rate                 | <b>4.0 MBits/s *</b> |
| Clock Polarity (CPOL)     | Low                  |
| Clock Phase (CPHA)        | 1 Edge               |

#### Advanced Parameters:

|                 |          |
|-----------------|----------|
| CRC Calculation | Disabled |
| NSSP Mode       | Enabled  |
| NSS Signal Type | Software |

## 5.17. SYS

**Debug: Serial Wire**

**mode: System Wake-Up 2**

**Power Voltage Detector In: Power Voltage Detector In (Internal analog voltage)**

**VREFBUF Mode: Internal voltage reference**

**Timebase Source: TIM2**

### 5.17.1. Parameter Settings:

#### Programmable\_Voltage\_Detector\_Settings:

|                     |                         |
|---------------------|-------------------------|
| PVD detection Level | PWR PVD LEVEL 0 (2.0 V) |
| PWR PVD Mode        | basic mode is used      |

#### Voltage\_Reference\_Buffer\_Settings:

|                                  |                         |
|----------------------------------|-------------------------|
| Trimming Mode                    | Factory Trimming        |
| Internal Voltage reference scale | SCALE 0: around 2.048 V |

## 5.18. TIM1

**Clock Source : Internal Clock**

### 5.18.1. Parameter Settings:

#### Counter Settings:

|   |             |
|---|-------------|
| Prescaler (PSC - 16 bits value)                       | 0           |
| Counter Mode  | Up          |
| Counter Period (AutoReload Register - 16 bits value ) | 0           |
| Internal Clock Division (CKD)                         | No Division |
| Repetition Counter (RCR - 8 bits value)               | 0           |
| auto-reload preload                                   | Disable     |

#### Trigger Output (TRGO) Parameters:

|                               |  |
|-------------------------------|--|
| Master/Slave Mode (MSM bit)   | Disable (Trigger input effect not delayed) |
| Trigger Event Selection TRGO  | Reset (UG bit from TIMx_EGR)               |
| Trigger Event Selection TRGO2 | Reset (UG bit from TIMx_EGR)               |

## 5.19. TIM3

**Clock Source : Internal Clock**

**Channel1: PWM Generation CH1**

**Channel2: PWM Generation CH2**

**Channel3: PWM Generation CH3**

### 5.19.1. Parameter Settings:

#### Counter Settings:

|   |                 |
|---|-----------------|
| Prescaler (PSC - 16 bits value)                       | 0               |
| Counter Mode  | Up              |
| Counter Period (AutoReload Register - 16 bits value ) | 0               |
| Internal Clock Division (CKD)                         | No Division     |
| auto-reload preload                                   | <b>Enable *</b> |

#### Trigger Output (TRGO) Parameters:

|                              |  |
|------------------------------|--|
| Master/Slave Mode (MSM bit)  | Disable (Trigger input effect not delayed) |
| Trigger Event Selection TRGO | Reset (UG bit from TIMx_EGR)               |

#### Clear Input:

|                    |         |
|--------------------|---------|
| Clear Input Source | Disable |
|--------------------|---------|

**PWM Generation Channel 1:**

|                       |            |
|-----------------------|------------|
| Mode                  | PWM mode 1 |
| Pulse (16 bits value) | 0          |
| Fast Mode             | Disable    |
| CH Polarity           | High       |

#### **PWM Generation Channel 2:**

|                       |            |
|-----------------------|------------|
| Mode                  | PWM mode 1 |
| Pulse (16 bits value) | 0          |
| Fast Mode             | Disable    |
| CH Polarity           | High       |

#### **PWM Generation Channel 3:**

|                       |            |
|-----------------------|------------|
| Mode                  | PWM mode 1 |
| Pulse (16 bits value) | 0          |
| Fast Mode             | Disable    |
| CH Polarity           | High       |

## **5.20. TIM5**

**Clock Source : Internal Clock**

**Channel1: Input Capture direct mode**

**Channel2: Input Capture direct mode**

**Channel3: Input Capture direct mode**

**Channel4: Input Capture direct mode**

### **5.20.1. Parameter Settings:**

#### **Counter Settings:**

|   |                 |
|---|-----------------|
| Prescaler (PSC - 16 bits value)                       | 0               |
| Counter Mode  | Up              |
| Counter Period (AutoReload Register - 32 bits value ) | 0               |
| Internal Clock Division (CKD)                         | No Division     |
| auto-reload preload                                   | <b>Enable *</b> |

#### **Trigger Output (TRGO) Parameters:**

|                              |  |
|------------------------------|--|
| Master/Slave Mode (MSM bit)  | Disable (Trigger input effect not delayed) |
| Trigger Event Selection TRGO | Reset (UG bit from TIMx_EGR)               |

#### **Input Capture Channel 1:**

|                             |             |
|-----------------------------|-------------|
| Polarity Selection          | Rising Edge |
| IC Selection                | Direct      |
| Prescaler Division Ratio    | No division |
| Input Filter (4 bits value) | 0           |

#### **Input Capture Channel 2:**

|                             |             |
|-----------------------------|-------------|
| Polarity Selection          | Rising Edge |
| IC Selection                | Direct      |
| Prescaler Division Ratio    | No division |
| Input Filter (4 bits value) | 0           |

#### Input Capture Channel 3:

|                             |             |
|-----------------------------|-------------|
| Polarity Selection          | Rising Edge |
| IC Selection                | Direct      |
| Prescaler Division Ratio    | No division |
| Input Filter (4 bits value) | 0           |

#### Input Capture Channel 4:

|                             |             |
|-----------------------------|-------------|
| Polarity Selection          | Rising Edge |
| IC Selection                | Direct      |
| Prescaler Division Ratio    | No division |
| Input Filter (4 bits value) | 0           |

## 5.21. TIM16

mode: Activated

### 5.21.1. Parameter Settings:

#### Counter Settings:

|   |             |
|---|-------------|
| Prescaler (PSC - 16 bits value)                       | 0           |
| Counter Mode  | Up          |
| Counter Period (AutoReload Register - 16 bits value ) | 0           |
| Internal Clock Division (CKD)                         | No Division |
| Repetition Counter (RCR - 8 bits value)               | 0           |
| auto-reload preload                                   | Disable     |

## 5.22. TIM17

mode: Activated

### 5.22.1. Parameter Settings:

#### Counter Settings:

|   |             |
|---|-------------|
| Prescaler (PSC - 16 bits value)                       | 0           |
| Counter Mode  | Up          |
| Counter Period (AutoReload Register - 16 bits value ) | 0           |
| Internal Clock Division (CKD)                         | No Division |
| Repetition Counter (RCR - 8 bits value)               | 0           |

auto-reload preload

Disable

## 5.23. USART1

**Mode: Asynchronous**

**Hardware Flow Control (RS232): CTS/RTS**

### 5.23.1. Parameter Settings:

#### Basic Parameters:

|             |                           |
|-------------|---------------------------|
| Baud Rate   | <b>38400 *</b>            |
| Word Length | 8 Bits (including Parity) |
| Parity      | None                      |
| Stop Bits   | 1                         |

#### Advanced Parameters:

|                |                      |
|----------------|----------------------|
| Data Direction | Receive and Transmit |
| Over Sampling  | 16 Samples           |
| Single Sample  | Disable              |

#### Advanced Features:

|                               |         |
|-------------------------------|---------|
| Auto Baudrate                 | Disable |
| TX Pin Active Level Inversion | Disable |
| RX Pin Active Level Inversion | Disable |
| Data Inversion                | Disable |
| TX and RX Pins Swapping       | Disable |
| Overrun                       | Enable  |
| DMA on RX Error               | Enable  |
| MSB First                     | Disable |

## 5.24. USART2

**Mode: Asynchronous**

**Hardware Flow Control (RS232): CTS/RTS**

### 5.24.1. Parameter Settings:

#### Basic Parameters:

|             |                           |
|-------------|---------------------------|
| Baud Rate   | <b>38400 *</b>            |
| Word Length | 8 Bits (including Parity) |
| Parity      | None                      |
| Stop Bits   | 1                         |

**Advanced Parameters:**

|                |                      |
|----------------|----------------------|
| Data Direction | Receive and Transmit |
| Over Sampling  | 16 Samples           |
| Single Sample  | Disable              |

**Advanced Features:**

|                               |         |
|-------------------------------|---------|
| Auto Baudrate                 | Disable |
| TX Pin Active Level Inversion | Disable |
| RX Pin Active Level Inversion | Disable |
| Data Inversion                | Disable |
| TX and RX Pins Swapping       | Disable |
| Overrun                       | Enable  |
| DMA on RX Error               | Enable  |
| MSB First                     | Disable |

## 5.25. USART3

**Mode: Asynchronous**

**Hardware Flow Control (RS232): CTS/RTS**

### 5.25.1. Parameter Settings:

**Basic Parameters:**

|             |                           |
|-------------|---------------------------|
| Baud Rate   | <b>38400 *</b>            |
| Word Length | 8 Bits (including Parity) |
| Parity      | None                      |
| Stop Bits   | 1                         |

**Advanced Parameters:**

|                |                      |
|----------------|----------------------|
| Data Direction | Receive and Transmit |
| Over Sampling  | 16 Samples           |
| Single Sample  | Disable              |

**Advanced Features:**

|                               |         |
|-------------------------------|---------|
| Auto Baudrate                 | Disable |
| TX Pin Active Level Inversion | Disable |
| RX Pin Active Level Inversion | Disable |
| Data Inversion                | Disable |
| TX and RX Pins Swapping       | Disable |
| Overrun                       | Enable  |
| DMA on RX Error               | Enable  |
| MSB First                     | Disable |

## 5.26. USB\_OTG\_FS

**Mode: Device\_Only**

**Activate\_VBUS: VBUS sensing**

### 5.26.1. Parameter Settings:

|                                     |                     |
|-------------------------------------|---------------------|
| Speed                               | Full Speed 12MBit/s |
| Endpoint 0 Max Packet size          | 64 Bytes            |
| Enable internal IP DMA              | Disabled            |
| Low power                           | Disabled            |
| Battery charging                    | <b>Disabled *</b>   |
| Link Power Management               | <b>Enabled *</b>    |
| Use dedicated end point 1 interrupt | Disabled            |
| VBUS sensing                        | Enabled             |
| Signal start of frame               | <b>Enabled *</b>    |

## 5.27. FREERTOS

**mode: Enabled**

### 5.27.1. Config parameters:

#### Versions:

|                    |       |
|--------------------|-------|
| FreeRTOS version   | 9.0.0 |
| CMSIS-RTOS version | 1.02  |

#### Kernel settings:

|                               |                  |
|-------------------------------|------------------|
| USE_PREEMPTION                | Enabled          |
| CPU_CLOCK_HZ                  | SystemCoreClock  |
| TICK_RATE_HZ                  | 1000             |
| MAX_PRIORITIES                | 7                |
| MINIMAL_STACK_SIZE            | 128              |
| MAX_TASK_NAME_LEN             | 16               |
| USE_16_BIT_TICKS              | Disabled         |
| IDLE_SHOULD_YIELD             | Enabled          |
| USE_MUTEXES                   | Enabled          |
| USE_RECURSIVE_MUTEXES         | Disabled         |
| USE_COUNTING_SEMAPHORES       | <b>Enabled *</b> |
| QUEUE_REGISTRY_SIZE           | <b>16 *</b>      |
| USE_APPLICATION_TASK_TAG      | <b>Enabled *</b> |
| ENABLE_BACKWARD_COMPATIBILITY |                  |

|                                   |                   |
|-----------------------------------|-------------------|
|                                   | <b>Disabled *</b> |
| USE_PORT_OPTIMISED_TASK_SELECTION | Enabled           |
| USE_TICKLESS_IDLE                 | Disabled          |
| USE_TASK_NOTIFICATIONS            | Enabled           |

#### Memory management settings:

|                          |                |
|--------------------------|----------------|
| Memory Allocation        | Dynamic        |
| TOTAL_HEAP_SIZE          | <b>16384 *</b> |
| Memory Management scheme | heap_4         |

#### Hook function related definitions:

|                              |                  |
|------------------------------|------------------|
| USE_IDLE_HOOK                | <b>Enabled *</b> |
| USE_TICK_HOOK                | Disabled         |
| USE_MALLOC_FAILED_HOOK       | <b>Enabled *</b> |
| USE_DAEMON_TASK_STARTUP_HOOK | Disabled         |
| CHECK_FOR_STACK_OVERFLOW     | <b>Option2 *</b> |

#### Run time and task stats gathering related definitions:

|                                |                  |
|--------------------------------|------------------|
| GENERATE_RUN_TIME_STATS        | <b>Enabled *</b> |
| USE_TRACE_FACILITY             | <b>Enabled *</b> |
| USE_STATS_FORMATTING_FUNCTIONS | <b>Enabled *</b> |

#### Co-routine related definitions:

|                           |          |
|---------------------------|----------|
| USE_CO_ROUTINES           | Disabled |
| MAX_CO_ROUTINE_PRIORITIES | 2        |

#### Software timer definitions:

|                        |             |
|------------------------|-------------|
| USE_TIMERS             | Enabled     |
| TIMER_TASK_PRIORITY    | 2           |
| TIMER_QUEUE_LENGTH     | <b>16 *</b> |
| TIMER_TASK_STACK_DEPTH | 256         |

#### Interrupt nesting behaviour configuration:

|  |    |
|--|----|
| LIBRARY_LOWEST_INTERRUPT_PRIORITY      | 15 |
| LIBRARY_MAX_SYSCALL_INTERRUPT_PRIORITY | 5  |

### 5.27.2. Include parameters:

#### Include definitions:

|                       |                   |
|-----------------------|-------------------|
| vTaskPrioritySet      | Enabled           |
| uxTaskPriorityGet     | Enabled           |
| vTaskDelete           | <b>Disabled *</b> |
| vTaskCleanUpResources | Disabled          |
| vTaskSuspend          | Enabled           |
| vTaskDelayUntil       | <b>Enabled *</b>  |

|                             |                  |
|-----------------------------|------------------|
| vTaskDelay                  | Enabled          |
| xTaskGetSchedulerState      | Enabled          |
| xTaskResumeFromISR          | Enabled          |
| xQueueGetMutexHolder        | <b>Enabled *</b> |

## 5.28. USB\_DEVICE

### Class For FS IP: Communication Device Class (Virtual Port Com)

#### 5.28.1. Parameter Settings:

##### Basic Parameters:

|  |                                    |
|--|------------------------------------|
| USBD_MAX_NUM_INTERFACES (Maximum number of supported interfaces)       | 1                                  |
| USBD_MAX_NUM_CONFIGURATION (Maximum number of supported configuration) | 1                                  |
| USBD_MAX_STR_DESC_SIZ (Maximum size for the string descriptors)        | 512                                |
| USBD_SUPPORT_USER_STRING (Enable user string descriptor)               | Disabled                           |
| USBD_SELF_POWERED (Enabled self power)                                 | <b>Disabled *</b>                  |
| USBD_DEBUG_LEVEL (USBD Debug Level)                                    | 0: No debug message                |
| USBD_LPM_ENABLED (Link Power Management)                               | 1: Link Power Management supported |

##### Class Parameters:

|                        |      |
|------------------------|------|
| USB CDC Rx Buffer Size | 2048 |
| USB CDC Tx Buffer Size | 2048 |

#### 5.28.2. Device Descriptor:

##### Device Descriptor:

|   |                              |
|---|------------------------------|
| VID (Vendor Identifier)                       | 1155                         |
| LANGID_STRING (Language Identifier)           | English(United States)       |
| MANUFACTURER_STRING (Manufacturer Identifier) | <b>HSMA HFT Laborities *</b> |

##### Device Descriptor FS:

|   |                          |
|---|--------------------------|
| PID (Product Identifier)                        | 22336                    |
| PRODUCT_STRING (Product Identifier)             | <b>HFT-Core_Module *</b> |
| SERIALNUMBER_STRING (Serial number)             | <b>000000000001 *</b>    |
| CONFIGURATION_STRING (Configuration Identifier) | CDC Config               |
| INTERFACE_STRING (Interface Identifier)         | CDC Interface            |

\* User modified value

## 6. System Configuration

### 6.1. GPIO configuration

| IP   | Pin                   | Signal        | GPIO mode                      | GPIO pull/up pull down      | Max Speed   | User Label          |
|------|-----------------------|---------------|--------------------------------|-----------------------------|-------------|---------------------|
| ADC1 | PA3                   | ADC1_IN8      | Analog mode for ADC conversion | No pull-up and no pull-down | n/a         | MCU_VSOL_ADC1       |
| ADC3 | PF3                   | ADC3_IN6      | Analog mode for ADC conversion | No pull-up and no pull-down | n/a         | ADC3_IN6_20MHZ_PULL |
| I2C1 | PG13                  | I2C1_SDA      | Alternate Function Open Drain  | Pull-up                     | Very High * | MCU_I2C1_SDA        |
|      | PG14                  | I2C1_SCL      | Alternate Function Open Drain  | Pull-up                     | Very High * | MCU_I2C1_SCL        |
| I2C2 | PF0                   | I2C2_SDA      | Alternate Function Open Drain  | Pull-up                     | Very High * | MCU_I2C2_SDA        |
|      | PF1                   | I2C2_SCL      | Alternate Function Open Drain  | Pull-up                     | Very High * | MCU_I2C2_SCL        |
| I2C3 | PG7                   | I2C3_SCL      | Alternate Function Open Drain  | Pull-up                     | Very High * | MCU_I2C3_SCL        |
|      | PG8                   | I2C3_SDA      | Alternate Function Open Drain  | Pull-up                     | Very High * | MCU_I2C3_SDA        |
| I2C4 | PF14                  | I2C4_SCL      | Alternate Function Open Drain  | Pull-up                     | Very High * | MCU_I2C4_SCL        |
|      | PD13                  | I2C4_SDA      | Alternate Function Open Drain  | Pull-up                     | Very High * | MCU_I2C4_SDA        |
| RCC  | PC14-OSC32_IN (PC14)  | RCC_OSC32_IN  | n/a                            | n/a                         | n/a         | MCU_OSC32_IN        |
|      | PC15-OSC32_OUT (PC15) | RCC_OSC32_OUT | n/a                            | n/a                         | n/a         | MCU_OSC32_OUT       |
|      | PH0-OSC_IN (PH0)      | RCC_OSC_IN    | n/a                            | n/a                         | n/a         | MCU_HSE             |
|      | PA8                   | RCC_MCO       | Alternate Function Push Pull   | No pull-up and no pull-down | Low         | MCU_MCO             |
| SAI1 | PE3                   | SAI1_SD_B     | Alternate Function Push Pull   | No pull-up and no pull-down | Low         | I2S_SD_OUT          |
|      | PE8                   | SAI1_SCK_B    | Alternate Function Push Pull   | No pull-up and no pull-down | Low         | I2S_SCK_OUT         |
|      | PE9                   | SAI1_FS_B     | Alternate Function Push Pull   | No pull-up and no pull-down | Low         | I2S_FS_OUT          |
|      | PE10                  | SAI1_MCLK_B   | Alternate Function Push Pull   | No pull-up and no pull-down | Low         | I2S_MCLK_OUT        |
| SAI2 | PB13                  | SAI2_SCK_A    | Alternate Function Push Pull   | No pull-up and no pull-down | Low         |                     |
|      | PD11                  | SAI2_SD_A     | Alternate Function Push Pull   | No pull-up and no pull-down | Low         |                     |

## 7. Power Consumption Calculator report

### 7.1. Microcontroller Selection

|           |                |
|-----------|----------------|
| Series    | STM32L4        |
| Line      | STM32L4x6      |
| MCU       | STM32L496ZGTxP |
| Datasheet | 029173_Rev2    |

### 7.2. Parameter Selection

|             |     |
|-------------|-----|
| Temperature | 25  |
| Vdd         | 3.6 |

### 7.3. SMPS Selection

|            |            |
|------------|------------|
| SMPS       | SMPS1_User |
| Vin        | 3.3 V      |
| Vout       | 1.2 V      |
| OffCurrent | 250.0 nA   |
| QCurrent   | 500.0 nA   |
| Efficiency | 85 %       |

## 8. Software Project

### 8.1. Project Settings

| Name                              | Value   |
|-----------------------------------|---|
| Project Name                      | HFT-Core-Module_TrueSTUDIO                          |
| Project Folder                    | Z:\nfs_ds_nfs\git\HFT-Core-Module__SW\SW\TrueSTUDIO |
| Toolchain / IDE                   | TrueSTUDIO  |
| Firmware Package Name and Version | STM32Cube FW_L4 V1.12.0                             |

### 8.2. Code Generation Settings

| Name  | Value                                 |
|---|---------------------------------------|
| STM32Cube Firmware Library Package                              | Copy only the necessary library files |
| Generate peripheral initialization as a pair of '.c/.h' files   | No                                    |
| Backup previously generated files when re-generating            | No                                    |
| Delete previously generated files when not re-generated         | Yes                                   |
| Set all free pins as analog (to optimize the power consumption) | No                                    |
